**NASLOV PROJEKTA: Computer Supported Continuous Distant Learning for Nurses –
COCSLEN** (Bilateralni projekt: Slovenija – Grčija)

PARTNERJI:

1. **Univerza v Mariboru, Fakulteta za zdravstvene vede**
    Žitna ulica 15
    2000 Maribor
    Slovenija

    Raziskovalci:
    Prof. dr. Peter Kokol
    Asist. dr. Helena Blažun
    Predav. Majda Šlajmer Japelj
    Asist. mag. Danijela Lahe
    Borut Gaber
    Aleksandra Lovrenčič
    Maja Štiglic

2. **University of Athens**
    Grčija

    VSEBINA PROJEKTA:
    Informacijska tehnologija vse bolj prodira tako v izobraževanje, kot tudi na področje
    zdravstvene nege. Mnoge študije so pokazale, da ima e-učenje v zdravstveni negi mnogo
    pozitivnih učinkov, a naše izkušnje kažejo, da se začetni entuziazem dokaj hitro izrabi in
    pozitivni učinki počasi pojenjajo. Zato bomo v projektu klasičnemu učenju dodali
    komponente inteligentnih sistemov, ki bodo učenje personalizirali glede na profile učencev
    ter njihov napredek in na tak način zagotovili trajne koristi e-učenja.

PROJECT TITLE: Computer Supported Continuous Distant Learning for Nurses – COCSLEN

PROJECT PARTNERS:

1. **University of Maribor, Faculty of Health Sciences**
   Žitna ulica 15
   2000 Maribor
   Slovenija

2. **University of Athens**
   Greece

PROJECT CONTENT:
Information technology is becoming important aspect in both - education as well as health care. Numerous studies have shown that e-learning in nursing presents positive effects, however our experience show that the initial enthusiasm wears out quickly and fairly positive effects slowly subside. Therefore, the project added a classic learning component of intelligent systems that personalize learning according to the student's profiles and their progress. In this way the lasting benefits of e-learning are ensured.
