

NASLOV PROJEKTA:

Joint development of online gerontological master degree programme - GEROM

PARTNERJI:

1. Univerza v Mariboru, Fakulteta za zdravstvene vede

Žitna ulica 15
2000 Maribor
Slovenija

Raziskovalci:

Prof. dr. Peter Kokol
Asist. dr. Helena Blažun
Doc. dr. Gregor Štiglic

2. Department of Health sciences, University of Oulu

Kajaanintie 46 E
90220 Oulu
Finland

Raziskovalci:

Prof. dr. Arja Isola

3. Medical University Plovdiv, College of Medicine

Ul. Buxton Bros. 120
4004 Plovdiv
Bulgaria

4. School of Nursing, Midwifery & Health Systems, University College Dublin

University College Dublin
Earlsfoot Terrace, Dublin 4
Ireland

Raziskovalka:

Rita Collins

5. University of Surrey (United Kingdom)

Duke of Kent Building
Guildford Surrey
GU2 7TE
England

Raziskovalka:

Dr Khim Horton

6. Carinthia University of Applied Sciences, School of Health and Care (Austria)

Hauptplatz 12
9560 Feldkirchen i.K.
Austria

Raziskovalka:

Dr Eva Brunner

7. Center for Interdisciplinary and Multidisciplinary Research and Studies

Krekova 2
2000 Maribor
Slovenia

VSEBINA PROJEKTA:

Cilj projekta je razvoj podiplomskega magistrskega programa Gerontološka zdravstvena nega, ki bo v celoti potekal kot izobraževanje na daljavo. V programu bodo uporabljene najnovejše multimedijske tehnologije, simulacije, virtualna resničnost itd.

Glede na hitre demografske spremembe, hiter napredek zdravstvenih znanosti ter obenem razvoj informacijsko komunikacijske tehnologije, so zdravstveni kadri prisiljeni k vseživljenjskemu izobraževanju. Prav tako so vedno višje zahteve starostnikov kar pomeni, da se mora kader, ki jih neguje, konstantno izobraževati. V sklopu projekta GEROM bomo oblikovali enotni magistrski študijski program na področju gerontološke zdravstvene nege, v katerega se bodo lahko vpisovali študenti vsi študenti iz različnih evropskih držav.

Podiplomski magistrski študijski program bo izvajan preko metode učenja na daljavo, kjer bomo implementirali različne didaktične pristope.

PROJECT CONTENT:

The aim of the project is the development of post-graduate master's program Gerontological nursing, which will be fully carried out as distance education. The program will be using the latest multimedia technology, simulation, virtual reality, etc...

Given the rapid demographic changes, rapid progress in medical science, and also the development of information and communication technologies, the medical personnel is forced to lifelong education. Also the elderly have higher requirements, which means that the personnel must engage in constant training in order to meet their needs. Through GEROM project the gerontological nursing master's program was developed, in which all the students from different European countries will be able to enroll.

Postgraduate study program can be implemented through the method of distance learning, which includes a variety of didactical methods and approaches.
